PROPRIETARY TECHNOLOGY

BLACK FIRE

TECHNOLOGY

BlackFire Technology

Engineered to disappear. Every pixel fused directly into the panel surface.

∞:1	Zero	Zero
CONTRAST	GLARE	GRID LINES

Zero Visible Pixel Structure

Advanced architecture fuses every pixel directly into the surface. No visible grid, no mounted LEDs. Anti-reflective coating absorbs ambient light for true black levels.

NanoPix

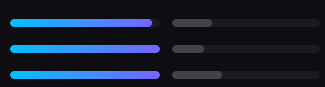
0.7mm pixel pitch. Pixel-level calibration for flawless uniformity at arm's length.

SilkStream

240Hz Refresh

15,360Hz panel rate. Zero motion blur on fast-moving content.

BLACKFIRE VS TRADITIONAL LED



BlackFire · Traditional LED

PRODUCT SERIES

Onyx Series — 0.7mm

Ultra-fine pitch for dedicated theaters and art display. NanoPix color precision + BlackFire contrast. Pixels invisible at arm's length.

4K @ 60Hz · 600 nits · BlackFire · NanoPix

Boulder Series — 0.9mm

The motion king. SilkStream 240Hz eliminates all motion blur. Ideal for sports, cinema, and gaming. 1,000 nit brightness.

4K @ 240Hz · 1,000 nits · SilkStream · BlackFire

Crystal Series — 0.9–1.2mm

Versatile premium all-rounder. BlackFire contrast for stunning picture in any lighting. Home theaters, boardrooms, and commercial spaces.

4K @ 60Hz · 600 nits · BlackFire

Doublet Series — 1.2–1.5mm

Smart commercial value. Excellent quality at 6+ ft viewing distances. Lobbies, retail, digital signage, and budget-conscious deployments.

4K @ 60Hz · 600 nits · Commercial

Water Series — IP65 Outdoor

IP65-rated outdoor display. 4,000 nit brightness cuts through direct sunlight. Anti-reflection coating for patios, venues, and pool areas.

IP65 · 4,000 nits · 1.2–1.875mm
