PROPRIETARY TECHNOLOGY

BLACKFIRE

TECHNOLOGY

Anti-glare matte nano-coating that eliminates reflections while preserving deep blacks and vivid color accuracy. Standard on Onyx, Boulder, Crystal, and Water series.

10,000:1 CONTRAST RATIO	**4H** SURFACE HARDNESS
178° VIEWING ANGLE	**100%** FRONT ACCESS

ALSO FEATURED

nanoPix NanoPix

Pixel-level calibration ensuring perfect uniformity across every panel. Onyx Series exclusive.

SilkStream

15,360Hz panel refresh enabling native 240Hz source input for ultra-smooth motion. Available first in Boulder Series.

OPAL SCREENS

SEEING IS BELIEVING

Premium MicroLED Video Walls

- Flip-chip MicroLED technology
- 0.7mm to 1.875mm pixel pitch
- Up to 4,000 nits brightness
- Seamless, bezel-free displays
- Dustproof & scrubbable surface
- Residential, commercial & outdoor

APPLICATIONS

Where Opal Screens Shine

Home Theater

Transform any room into a cinematic experience with seamless, bezel-free displays that disappear into the wall. Perfect blacks, zero burn-in, unlimited screen size.

Recommended: Boulder Series

Executive Boardroom

Ultra-fine pixel pitch for close-viewing presentations and video calls. Art-mode transforms the display into a gallery piece between meetings.

Recommended: Onyx Series

Houses of Worship

High brightness and wide viewing angles ensure every seat has a clear view. Scalable to any wall size with seamless panel-to-panel uniformity.

Recommended: Crystal Series

Retail & Hospitality

Eye-catching digital signage for lobbies, storefronts, and restaurant menus. Commercial-grade durability at an accessible price point.

Recommended: Doublet Series

Outdoor Venues

IP65 weatherproof displays with 4,000 nits of brightness cut through direct sunlight. Built for stadiums, pools, patios, and event spaces.

Recommended: Water Series

AT A GLANCE

Series Comparison

SERIES	PITCH	BRIGHTNESS	REFRESH	TECH
Onyx	0.7mm	600 nits	4K@60Hz	BlackFire, NanoPix
Boulder	0.9mm	1,000 nits	4K@240Hz	BlackFire, SilkStream
Crystal	0.9–1.2mm	600 nits	4K@60Hz	BlackFire
Doublet	1.2–1.5mm	600 nits	4K@60Hz	—
Water	1.2–1.875mm	4,000 nits	TBD	IP65 Outdoor

COMMON SPECS (INDOOR)

Cabinet: 600 × 337.5 × 39.75mm, 4kg
Module: 150 × 168.75mm (8/cabinet)
Contrast: ≤100,000:1
Access: 100% front, magnetic modules
Surface: Dustproof, moisture-proof, 4H hardness
Certifications: CE / CB / FCC / ETL / RoHS

WHY MICROLED?

Unlike OLED, MicroLED has zero burn-in risk, higher peak brightness, and unlimited lifespan. Unlike traditional LED, Opal's flip-chip technology delivers true pixel-level blacks with no visible grid lines.

PRODUCT LINEUP

The Opal Collection

Onyx Series

0.7mm pixel pitch • 600 nits • Indoor

The finest pixel pitch in the lineup for ultra-close viewing distances. Perfect for executive offices, art displays, and intimate home theaters where every detail matters.

BlackFire + NanoPix

Boulder Series

0.9mm pixel pitch • 1,000 nits • Indoor

The go-to home theater display. SilkStream 240Hz refresh delivers buttery-smooth sports, gaming, and action content with class-leading brightness.

BlackFire + SilkStream

Crystal Series

0.9–1.2mm pixel pitch • 600 nits • Indoor

Premium all-around performer for media rooms, living rooms, and commercial spaces. BlackFire coating ensures rich contrast in any lighting condition.

BlackFire

Doublet Series

1.2–1.5mm pixel pitch • 600 nits • Indoor

Budget-friendly option for large-format installations. Ideal for lobbies, retail environments, and commercial signage where viewing distance allows a wider pixel pitch.

Water Series

1.2–1.875mm pixel pitch • 4,000 nits • Outdoor

IP65 weatherproof displays built to perform in direct sunlight. Anti-reflection coating and extreme brightness for stadiums, patios, and outdoor entertainment.
