PROPRIETARY TECHNOLOGY

BLACKFIRE

ANTI-GLARE NANO-COATING

Matte nano-coating that eliminates reflections while preserving deep blacks and vivid color accuracy. Standard on Onyx, Boulder, Crystal, and Water series.

10,000:1 CONTRAST	**4H** HARDNESS
178° VIEWING ANGLE	**Zero** BURN-IN RISK

ALSO FEATURED

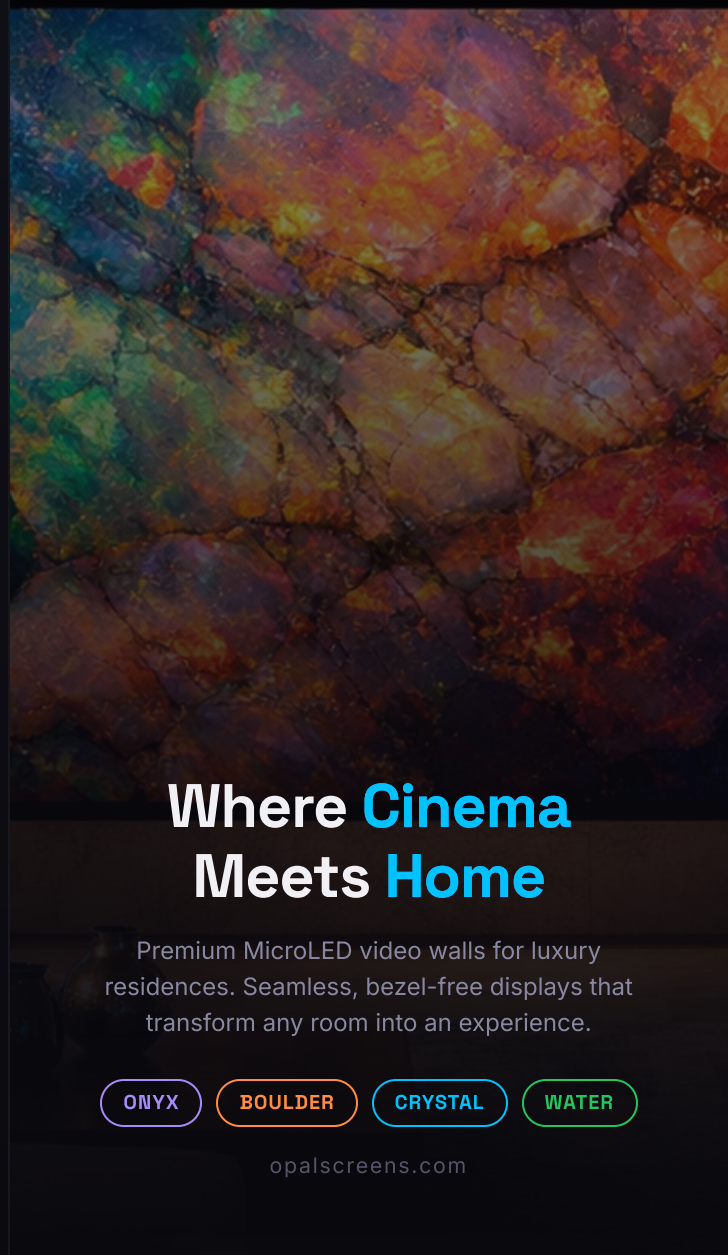
SilkStream 240Hz

15,360Hz panel refresh enabling native 240Hz source input for ultra-smooth sports, gaming, and action content. Available first in Boulder Series.

nanoPix

Pixel-level calibration ensuring perfect uniformity across every panel. Onyx Series exclusive.

OPAL SCREENS



Where Cinema Meets Home

Premium MicroLED video walls for luxury residences. Seamless, bezel-free displays that transform any room into an experience.

ONYX · BOULDER · CRYSTAL · WATER

APPLICATIONS

Designed for Luxury Living

Dedicated Home Cinema

Transform your theater into a truly cinematic experience with seamless, bezel-free displays that disappear into the wall. Perfect blacks, zero burn-in, unlimited screen size.

Recommended: Boulder Series (240Hz)

Great Room & Living Space

Art mode transforms the display into a gallery piece when not in use. BlackFire coating ensures rich contrast whether blinds are open or closed.

Recommended: Crystal Series

Study & Private Office

Ultra-fine 0.7mm pixel pitch for close viewing distances. Perfect for intimate spaces where you sit just feet from the display.

Recommended: Onyx Series

Outdoor Living & Pool

IP65 weatherproof displays with 4,000 nits cut through direct sunlight. Built for lanais, pool areas, and covered patios.

Recommended: Water Series

Optimal Viewing Distance

0.7mm	3–6 ft (study, close-up)
0.9mm	5–10 ft (home theater)
1.2mm	8–15 ft (great room)

AT A GLANCE

Series Comparison

WHICH SERIES IS RIGHT FOR YOU?

Onyx	Close viewing, art display, study
Boulder	Home theater, sports, gaming
Crystal	Living rooms, media rooms
Water	Outdoor, pool, patio

WHY MICROLED?

Unlike OLED, MicroLED delivers zero burn-in risk, higher peak brightness, and an unlimited lifespan. Unlike traditional LED, Opal's flip-chip technology produces true pixel-level blacks with no visible grid lines — the image simply floats on the wall.

PRODUCT LINEUP

The Opal Collection

Onyx Series

0.7mm pixel pitch · 600 nits · Indoor

Ultra-close viewing with 0.7mm pitch. NanoPix calibration ensures perfect uniformity across every panel. Ideal for studies, offices, and intimate theaters.

Refresh: 3,840Hz **Source:** 4K@60Hz

BlackFire + NanoPix

Best for: study, art display, close-viewing theater

Boulder Series

0.9mm pixel pitch · 1,000 nits · Indoor

The definitive home theater display. SilkStream 240Hz delivers buttery-smooth sports, gaming, and action content. Our go-to for dedicated cinema rooms.

Refresh: 15,360Hz **Source:** 4K@240Hz

BlackFire + SilkStream

Best for: home cinema, sports den, gaming lounge

Crystal Series

0.9–1.2mm pixel pitch · 600 nits · Indoor

Premium all-around performer for living spaces. BlackFire ensures rich contrast whether shades are open or drawn. Two pitch options to match your room.

Refresh: 3,840Hz **Source:** 4K@60Hz

BlackFire

Best for: great room, living space, media room

Water Series

1.2–1.875mm pixel pitch · 4,000 nits · Outdoor

IP65 weatherproof displays built for direct sunlight. 4,000 nits of brightness makes outdoor entertainment effortless, from pool parties to patio movie nights.

Rating: IP65 **Brightness:** 4,000 nits

IP65 Outdoor Rated

Best for: lanai, pool deck, covered patio
